

# Analytics + Execution = Smarter Healthcare for Everyone

Helping health plans make faster and better decisions about member health with a predictive, dynamic, real-time analytics platform.

## AI-Driven Intelligent Health Platform for Payers

Vital Data Technology's Affinitē platform is a powerful suite of applications designed to stratify, segment, and pinpoint actionable interventions, ensuring the timely and precise delivery of care. Affinitē represents the industry's only cloud-native, end-to-end platform seamlessly integrating advanced analytics with best-in-class tools for plans, providers, and members.

Discover why health plans trust Vital Data Technology to tackle key payer initiatives, cutting costs and creating better outcomes.

## Our Solutions

Each cloud-native solution within the Affinitē platform independently delivers robust features that significantly boost efficiency and productivity for payers.

When integrated and customized to specific payer needs, these solutions provide unmatched insights, collaboration, and stakeholder engagement.

### Clinical Analytics

- Advanced analytics
- Data integration & interoperability
- BI tools for plans, employers and other third parties
- Predictive analytics for immediate action

### Clinical Applications

- Care Management
